

Although the Solid State DAC's output can be connected to the Line In with an RCA Interconnect, we strongly recommend using a high quality transformer(ratio 1:1) so that the digital artifacts can be filtered. The Tube Line Amp has some inherent filtering characteristics above the ultrasonic range.

Coupling transformers are available from the following

www.jensen-transformer.com Type CI-2RR
 www.lundahl.se, type LL1592 or type 1517 with Balanced Out
 Dignity Audio Type NMT24
 available from Monarchy Audio
 email: monarchy@earthlink.net
